

Mastech Digital provides wing-to-wing efficiencies across your experience with SAP HANA. Right from your decision-making process through the SAP optimization for migration, implementation, integration, maintenance and security, Mastech assesses every touchpoint to deliver productivity and better returns on your SAP HANA investments.

Delivered using a global delivery framework and backed by a strong team of SAP-certified consultants, Mastech offers SAP Basis Support, SAP cleanup and IoT-based solutions on SAP HANA

## INTELLIGENCE WITH EFFICIENCY

SAP HANA simplifies your IT landscape, assembles intelligence in your data, and builds agility and innovation in your business decision making. We make this experience, more efficient.

### MASTECH DIGITAL NAVIGATOR

Our navigator-based program identifies your current location via our proprietary BizTech workshops. We identify your destination in these workshops and deliver an actionable strategic charter identifying what needs be done; along with a Playbook Roadmap that details the journey at a task level.

### FASTER.BETTER.EFFICIENT

Through our proven Fast-Eff-Migrate methodology we construct an optimization process that best suits your SAP BW environments. We offer assured levels of efficiency of at least 40% in your BoH migration projects.

### DIGITAL MONETIZATION TO IOT

IoT is one of the biggest disrupters in global competitiveness since computers. We provide Rapid Business Services (RBS®) and IoT Design Support on SAP HANA starting from Digital monetization to IoT enablement.

## Turn Key SAP Engagement

One handshake for all your Infrastructure, Network, Communications, Hardware, Security, Big-Data SAP and SAP HANA, IoT and IT Security.

## Keep Lights On

Our global support centers help keep your systems humming 24x7x365. We constantly monitor, predict issues, and fix things before they break down.

## Basis-in-a-Box

The foundation layer of all SAP applications is the Basis layer.

We provide world class Basis support to all SAP and SAP HANA requirements. Starting from simple migrations to SAP Upgrades, Optimization and HANA migrations. We also provide PoC-in-a-box for SAP HANA customers

## Tailored Data Center Integration

Not every customer is suited for an Appliance. We understand your business needs to define long term strategies and help you decide between Appliance and Tailored Data Center Integration.

## Security

Security is one of the major focus areas as we move to Big-Data, SAP HANA and IoT. We provide Security Support for traditional SAP applications, Stand-Alone HANA and Upgrades, BW Security along with end-to-end SAP HANA Security support
